

Research on Lossless Data Center Network in IHEP

Wednesday, 26 August 2020 14:20 (20 minutes)

The key to advancing cloud infrastructure to the next level is eliminate network loss, including packet loss, throughput loss and latency loss. The main reason for loss is congestion, we will present the recent study result on eliminating congestion in data center network and the thoughts on deploying lossless network in future HEPS experiment will also be discussed.

Primary author: ZENG, SHAN (IHEP)

Presenter: ZENG, SHAN (IHEP)

Session Classification: Network, Security, Infrastructure & Operations Session

Track Classification: Network, Security, Infrastructure & Operations
