

Federated Identity Management Plans at the SDCC

Tuesday, 25 August 2020 16:40 (20 minutes)

The evolving mission of the Scientific Data & Computing Center (SDCC) at BNL has grown to include support for nuclear physics (RHIC), high-energy physics (ATLAS, Belle-II and DUNE) and Photon Sciences (NSLS-II and CFN) among our major stakeholders. The diverse needs of the SDCC user community have guided our efforts to integrate federated identity services within our facility fabric and enable access to local and remote resources. In this presentation, we describe the status of our activities, the challenges faced to enable federated identity management system and the status of our newly federated tools and services.

Primary authors: Dr SMITH, Jason (Brookhaven National Laboratory); Mrs KARASAWA, Mizuki (Brookhaven National Laboratory); Dr MISAWA, Shigeki (Brookhaven National Laboratory); Dr WONG, Tony (Brookhaven National Laboratory)

Presenter: Dr SMITH, Jason (Brookhaven National Laboratory)

Session Classification: Network, Security, Infrastructure & Operations Session

Track Classification: Network, Security, Infrastructure & Operations
