ABOUT LEXIS

Co-funded by the Horizon 2020
Framework Programme of the European Union
Grant Agreement Number 825532

Large-scale EXecution for Industry & Society

  www.lexis-project.eu

Topic: HPC and Big Data enabled Large-scale Test-beds and Applications

Topic identifier: ICT-11-2018-2019

Type: **LEXIS project, led by Jan Martinovič, IT4I Supercomputing Center:**

Scop LEXIS project will build an advanced engineering **platform** at the confluence of **HPC, Cloud and Big Data** which will leverage large-scale **geographically-distributed resources** from existing HPC infrastructure, employ Big Data analytics solutions and augment them with Cloud services.

Project Driven by the requirements of the pilots, the LEXIS platform will build on best of breed **data management solutions** (EUDAT) and **advanced distributed orchestration solutions** (TOSCA), augmenting them with new efficient hardware capabilities in the form of Data Nodes and federation, usage monitoring and accounting/billing supports to realize an innovative solution.

LEXIS PILOT PROJECTS

General information - <https://lexis-project.eu>

Aeronautics

Computation Fluid Dynamics (CFD),
Rotating parts (gearboxes) – workflow
automation with 3D Visualization:
accelerated HW/SW coupling,
live monitoring/post-processing

Earthquakes & Tsunamis

Earthquakes & Tsunami prediction
models, geographic and urban
databases, emergency organization,
urgent computing

Weather & Climate

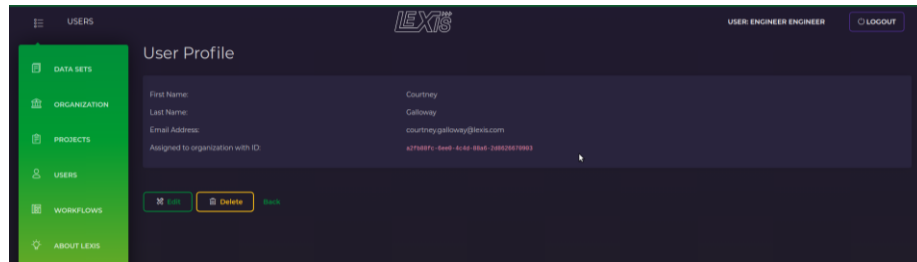

Weather & Climate models (WRF)
and various post-processors for
flood, wildfire & agriculture
applications

PLATFORM AND ORCHESTRATION

USER EXPERIENCE

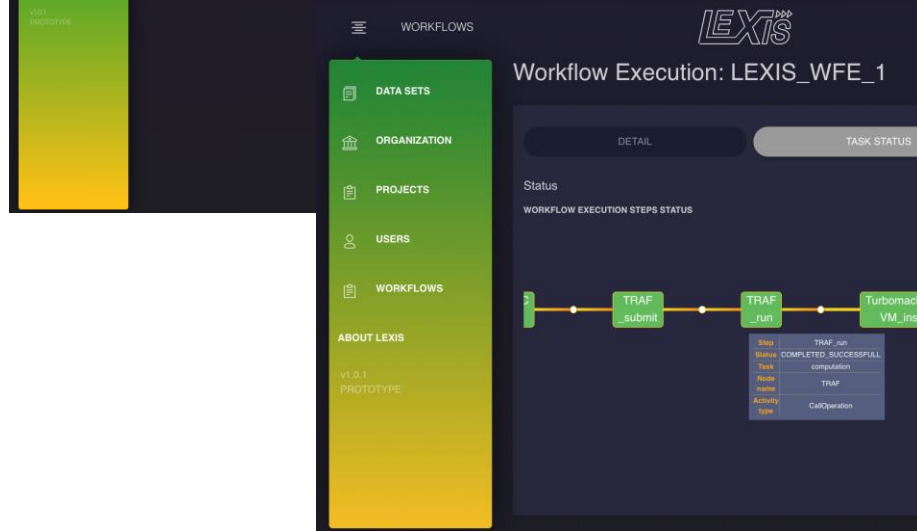

LEXIS portal

The screenshot shows the 'User Profile' page in the LEXIS portal. The user is logged in as 'ENGINEER ENGINEER'. The profile details include:

- First Name: Courtney
- Last Name: Galloway
- Email Address: courtney.galloway@lexis.com
- Assigned to organization with ID: 67588f7c-6e6d-4c4d-8b4d-288526519983

Buttons for 'Edit', 'Delete', and 'Back' are visible. The left sidebar contains navigation links for DATA SETS, ORGANIZATION, PROJECTS, USERS, WORKFLOWS, and ABOUT LEXIS.

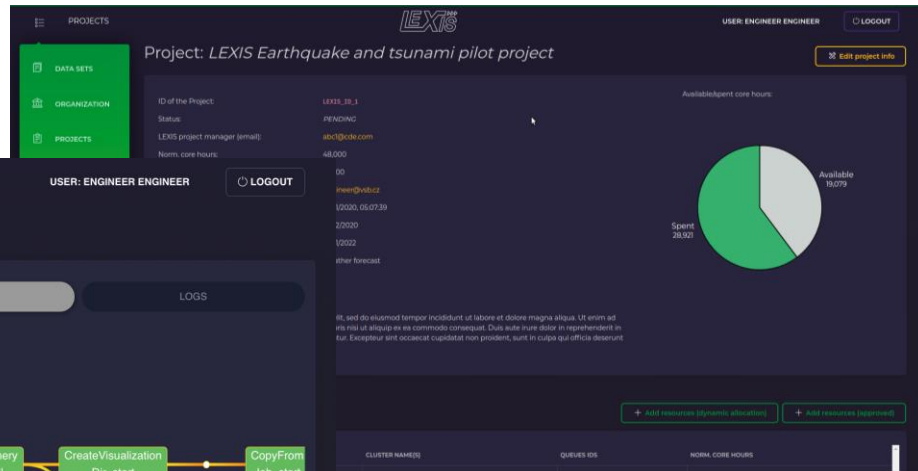

The screenshot shows the 'Workflow Execution: LEXIS_WFE_1' page. The workflow steps are:

- TRAF_submit
- TRAF_run
- Turbomachinery VM_install
- CreateVisualization Dir_start
- CopyFrom Job_start
- Xrv_create

The 'TASK STATUS' tab is selected, showing the status of the workflow steps. A table provides details for the 'TRAF_run' step:

Step	TRAF_run
Status	COMPLETED_SUCCESSFULL
Task	computations
Node	TRAF
Activity	CallOperation

The left sidebar contains navigation links for DATA SETS, ORGANIZATION, PROJECTS, USERS, WORKFLOWS, and ABOUT LEXIS.

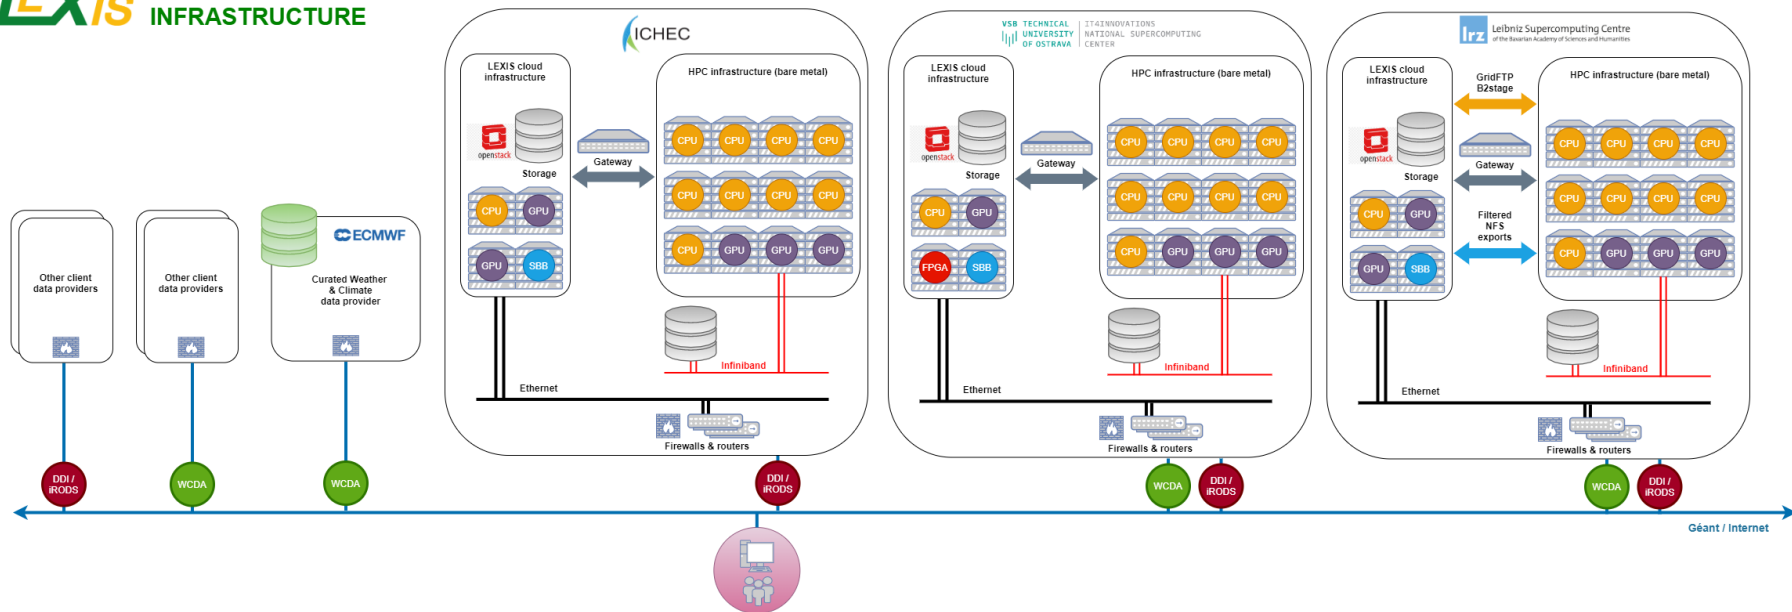

The screenshot shows the 'Project: LEXIS Earthquake and tsunami pilot project' page. The project details include:

- ID of the Project: LEXIS_38_1
- Status: PENDING
- LEXIS project manager (email): abc1@cdc.com
- Norm. core hours: 48,000

A pie chart shows the core hours usage: Available (19,079) and Spent (28,920). Buttons for 'Add Resource (dynamic allocation)' and 'Add Resource (legend)' are visible. The left sidebar contains navigation links for DATA SETS, ORGANIZATION, PROJECTS, USERS, WORKFLOWS, and ABOUT LEXIS.

LEXIS INFRASTRUCTURE OVERVIEW

LEXIS FEDERATED DATA
INFRASTRUCTURE

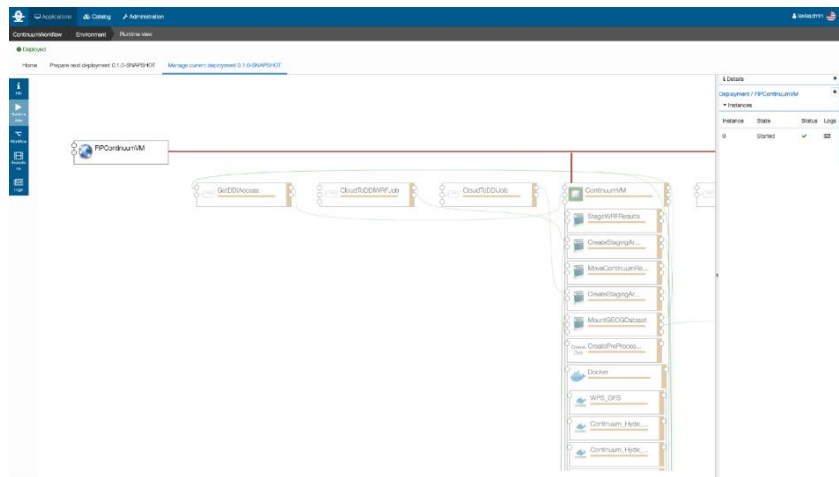

LEXIS ORCHESTRATION CONCEPT

HEAppE middleware + YORC (Ystia Orchestrator, based on TOSCA) + Alien4Cloud User Interface

From system to UI level:

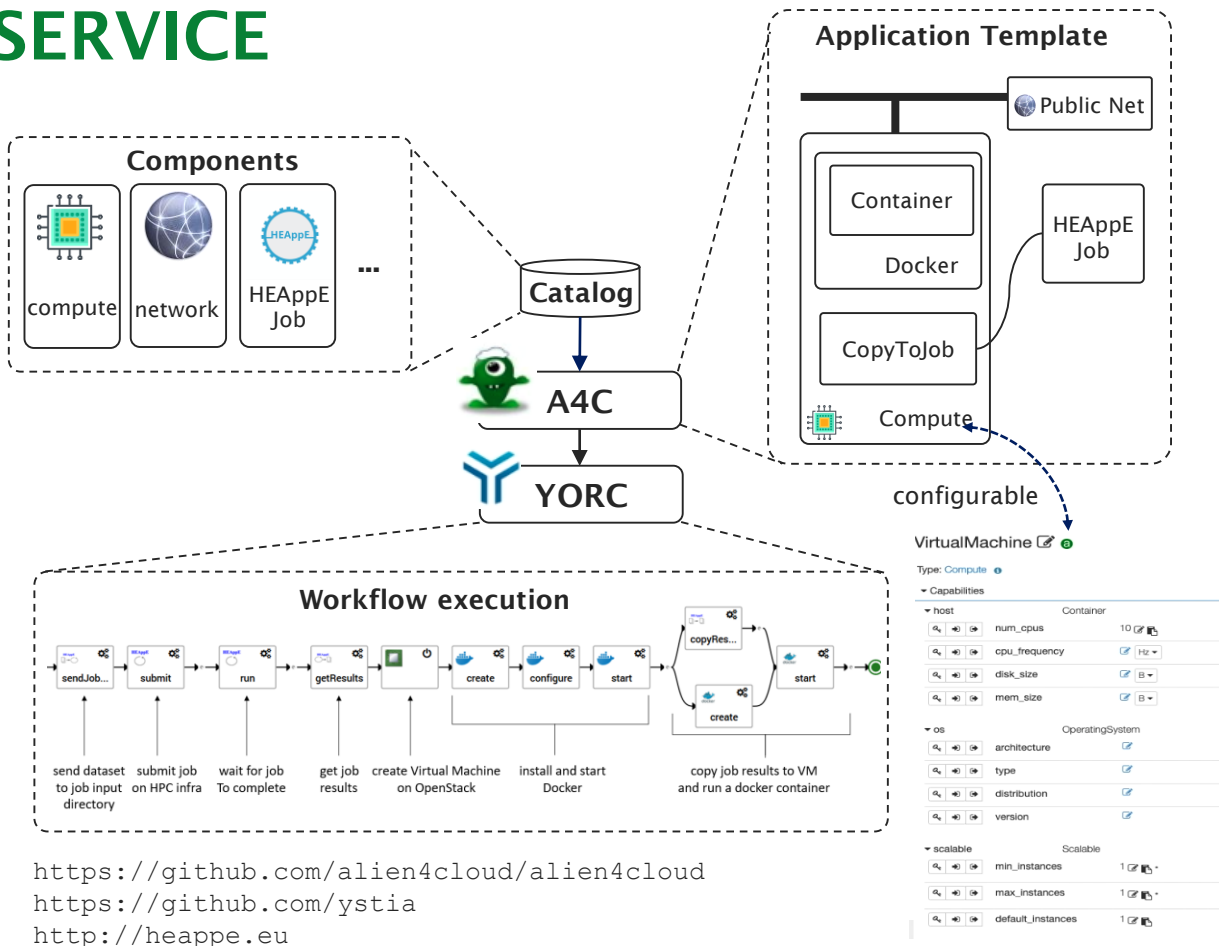

- **HEAppE**: middleware for unified HPC and Cloud access
- **Yorc**: orchestration service backend, executes application workflows
- **Alien4Cloud**: orchestration service frontend:
 - Catalogue for storing workflow application templates and components
 - UI for defining new workflows
 - Client library + REST API

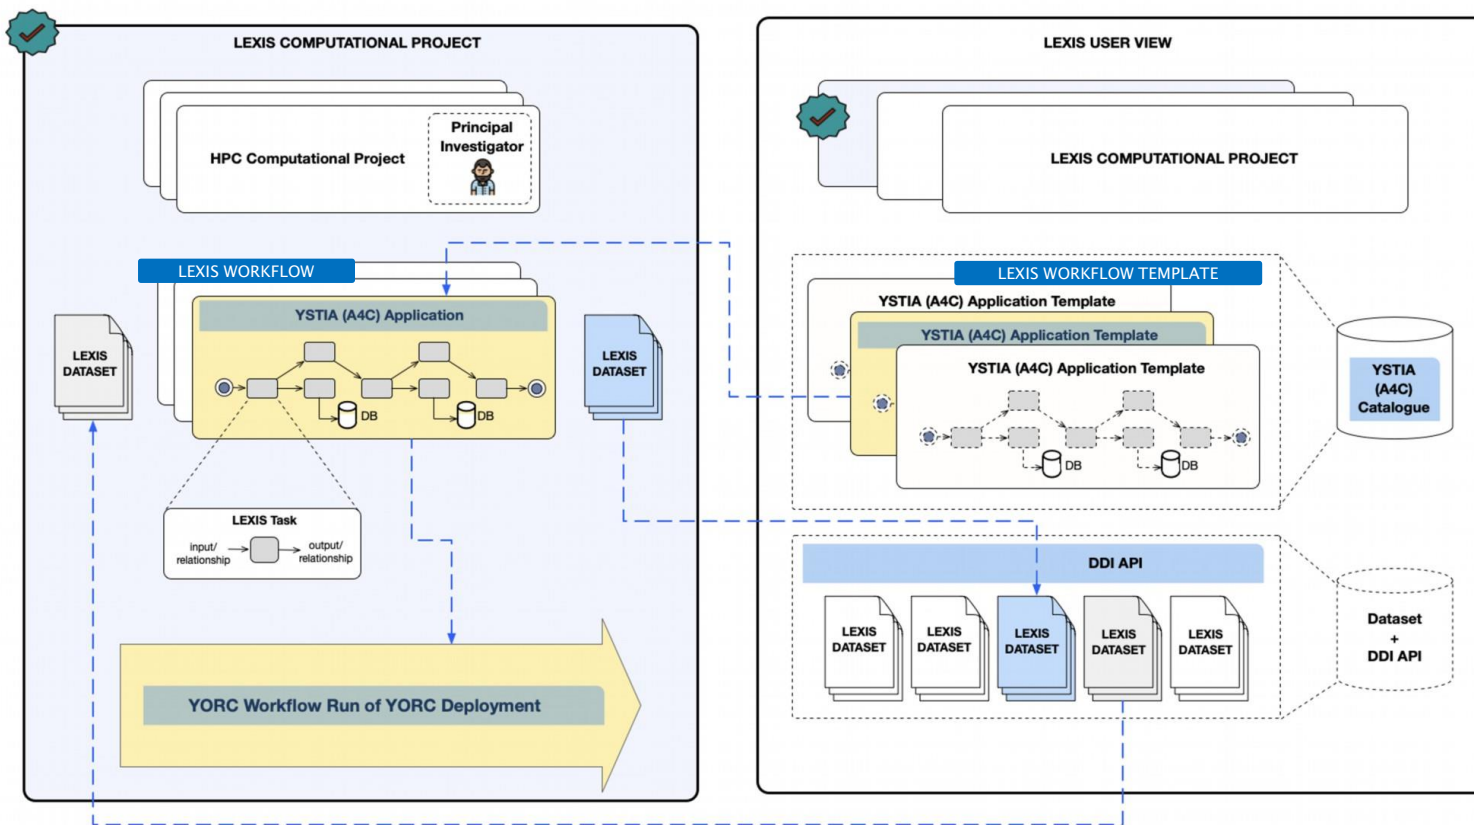

ORCHESTRATION SERVICE

Workflow deployment

- Execution on (geographically distributed) HPC and Cloud resources
 - **Cloud:** via OpenStack built-in interface
 - **HPC:** job execution is mediated by HEAppE middleware
- Data management and orchestration policies
 - Leverage the **LEXIS DDI** service for an effective data transfer between systems
 - Placement of **workflow tasks** on the most suitable resource

TERMINOLOGY – USER VIEW VS. TECHNOLOGY VIEW

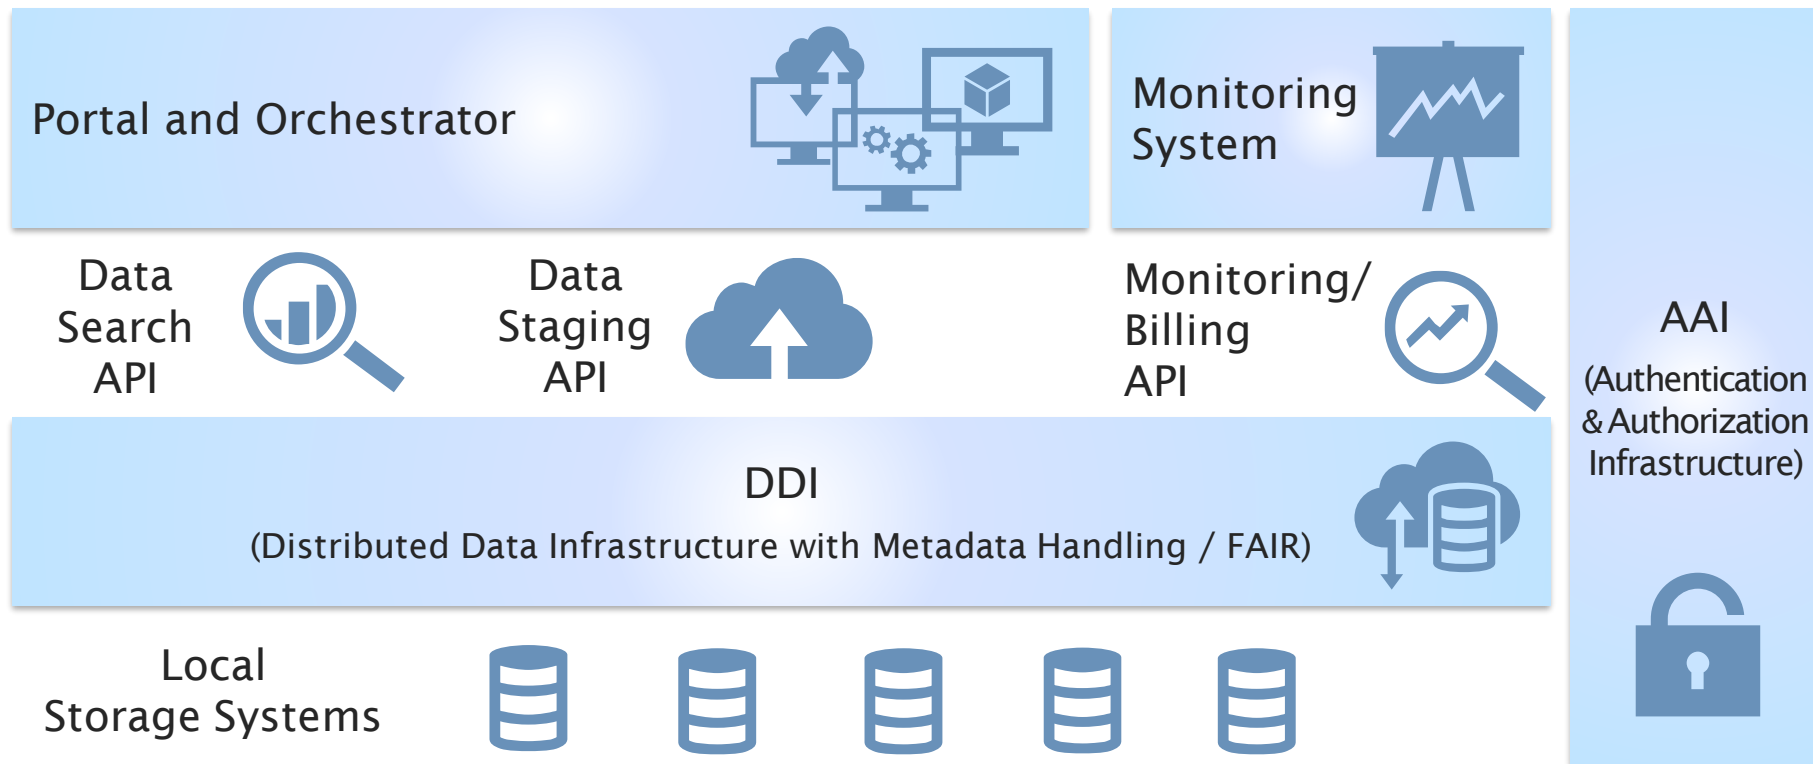

LEXIS DATA SYSTEM

(DISTRIBUTED DATA INFRASTRUCTURE – DDI)

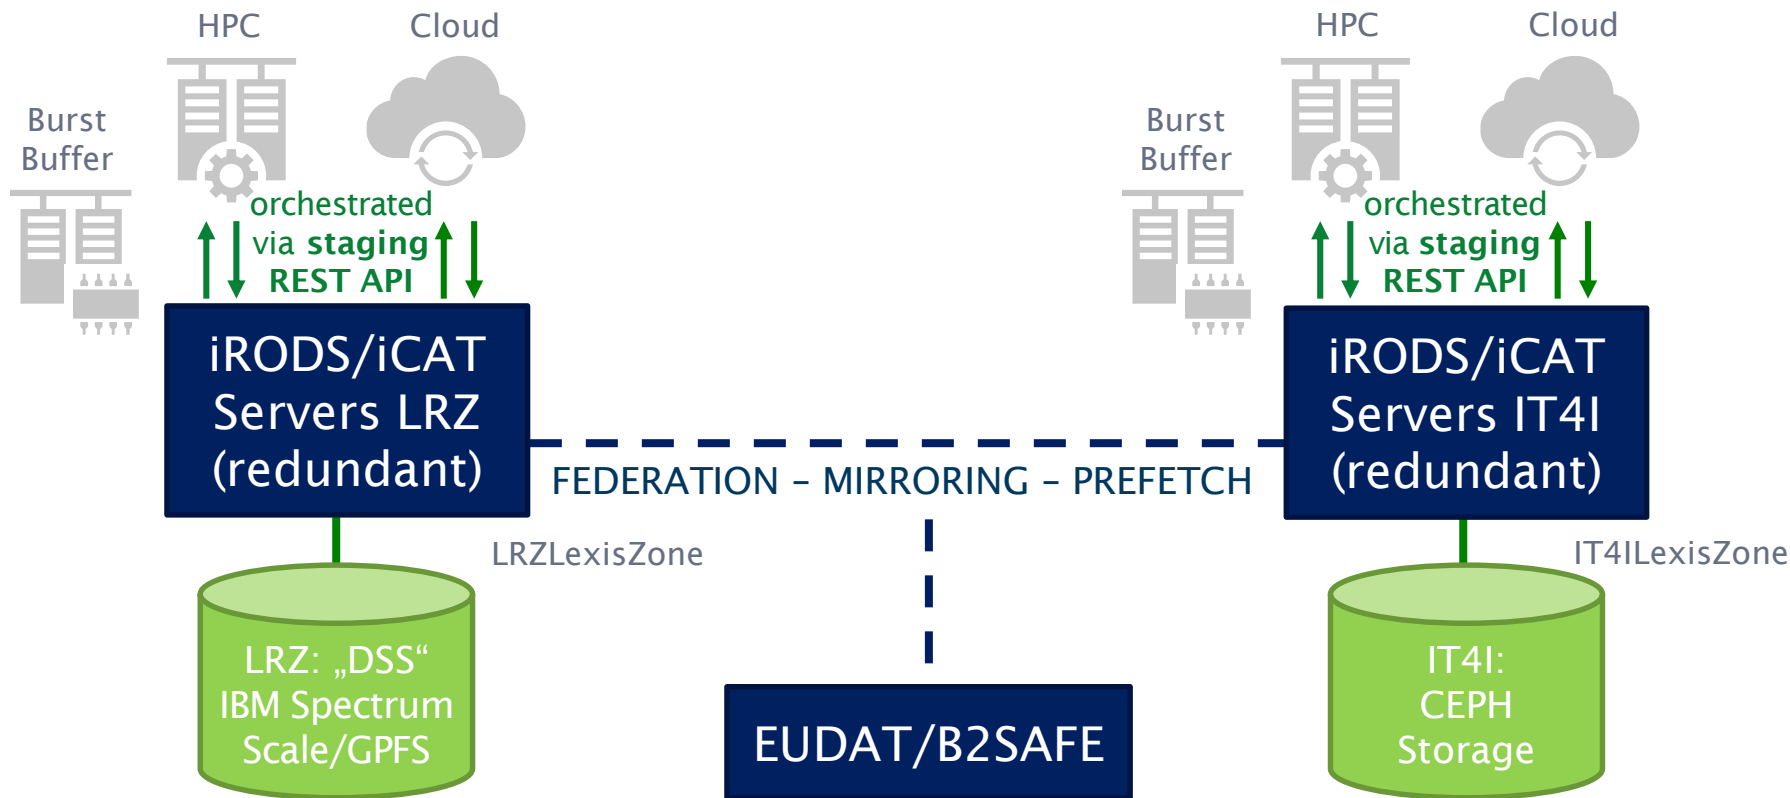

LEXIS DISTRIBUTED DATA INFRASTRUCTURE

Functionality in LEXIS ecosystem

LEXIS DISTRIBUTED DATA INFRASTRUCTURE

Backend functionality in more detail

INTEGRATION WITH EUDAT: B2HANDLE

- We equip data with EUDAT-B2HANDLE PIDs, based (as DOIs) on the Handle System (IETF RFCs 3650/51/52)
- Aim: long lasting references in
 - data management (B2SAFE)
 - search (B2FIND...), and
 - publication

Handle.Net®

Handle Values for: 1001/5a4948de-ee65-11e9-89b5-0050568f8e43

LEXIS INTEGRATION WITH REST APIS: STAGING API

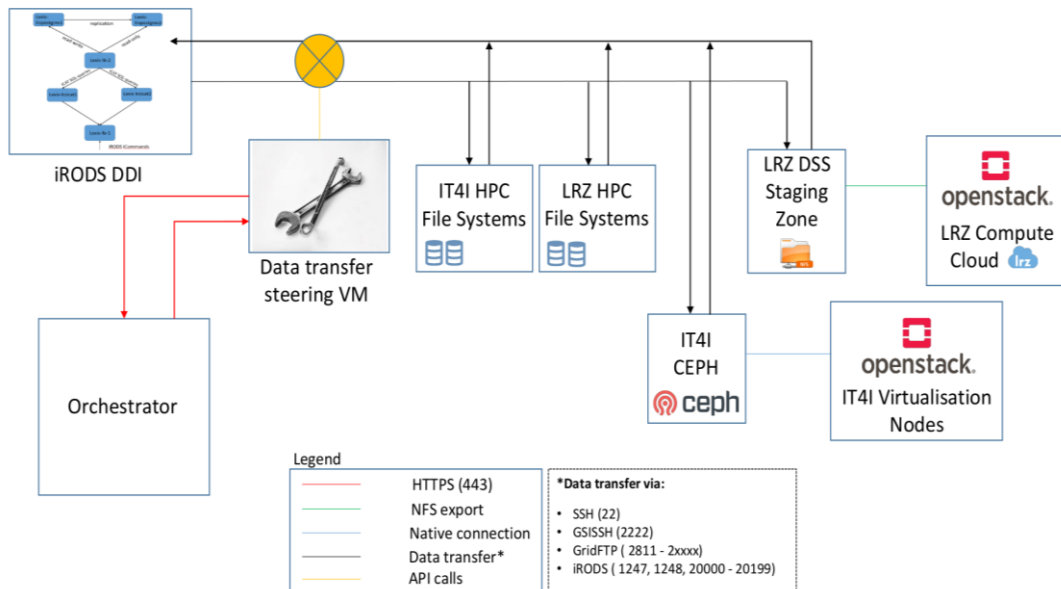

Overview of the Staging API

Endpoint	Method	Request body	Response body
/stage	POST	<pre>{ "source_system" : "lrz_iRODS", "source_path": "public/testruben/dataset-16168", "target_system": "lrz_staging_area", "target_path": "DDIStaging/dataset-161684" }</pre>	<pre>{ "request_id": "cc19e4a8-e4cf-4bca-bf7a-2bc9a27c44d6" }</pre>
/stage/<request_id>	GET	-	<pre>{ "status": "Transfer completed" }or { "status": "In progress" }</pre>
/delete	DELETE	<pre>{ "target_system": "lrz_staging_area", "target_path": "DDIStaging/dataset-161683" }</pre>	<pre>{ "request_id": "cc19e4a8-e4cf-4bca-bf7a-2bc9a27c44d6" }</pre>
/delete/<request_id>	GET	-	<pre>{ "status": "Data deleted" }or { "status": "In progress" }</pre>

BEHIND THE SCENES: LEXIS STAGING API

System View

- LEXIS orchestrator can move data by simple HTTP request
 - between iRODS,
 - Cloud, and
 - HPC resources at all LEXIS centers.
- Uses LEXIS AAI and the HEAppE middleware
- Queuing system using Celery and RabbitMQ handles requests asynchronously.

THE FAIR SIDE OF LEXIS: METADATA, PIDS

Findable, Accessible, Interoperable, Reuseable Research Data

- Most basic FAIR data requirements:
 - metadata
 - (world-)unique dataset identifier
- Metadata in LEXIS:
 - stored in iRODS Attribute-Value(-Unit) store for each data set
 - schema oriented at the basics from DataCite (schema.datacite.org)
- PIDs in LEXIS: B2HANDLE
- Aiming for findability of LEXIS public data sets via EUDAT-B2FIND

LEXIS OPEN CALL

LEXIS – OPEN CALL – OBJECTIVES

Objective: work with test users (including SMEs/industry) and various projects to

- validate platform w/r/t
 - technologies developed/deployed,
 - orchestration paradigm,
 - usability of data sets and DDI, and
- refine platform to warrant
 - optimum performance at end of the project, and
 - exploitation post-end-of-project.

Benefit for applicants:

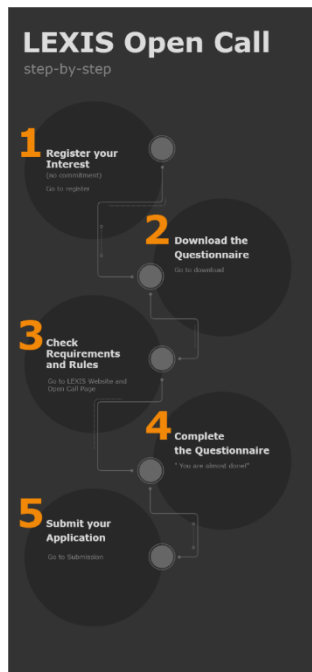

- test HPC/Cloud/Big Data platform with large resources “for free”
- get individual project & tech support + training from LEXIS team

LEXIS & OPEN CALL WEBSITE

Have a look on: <https://lexis-project.eu/web/open-call/> !

- 2nd stage running: Free application – reviewed by LEXIS Open Call Board
- Platform testing up to Q4/2021

The screenshot shows the LEXIS Open Call website. The header includes the LEXIS PROJECT logo and navigation links: About, LEXIS Project, Timeline, Contact, Subscribe to LEXIS newsletter, Newsletters, T T, f, in, y, Q. The main navigation bar highlights 'Open Call' among other options like LEXIS Platform, Outcomes, Services, Events, Blog, and Media Center. A news banner at the top states: 'The LEXIS Consortium has launched an *Open Call* in December 2020'. The main content area is titled 'Introduction' and includes a breadcrumb 'Home > Introduction'. The text describes the LEXIS project as building an advanced engineering Platform at the confluence of High-performance computing (HPC), Cloud and Big Data. A 'Relative Links' sidebar on the right lists: Introduction, Why Participating, Who can participate, and How to participate.

THANKS!
