EGI is a federation of over 300 computing and data centres spread across 56 countries in Europe and worldwide

EGI delivers advanced computing services to support scientists, multinational projects and research infrastructures

EGI is supported by the EGI-Engage project, co-funded by the European Union (EU) Horizon 2020 program under grant number 654142

EGI's mission is to create and deliver
open solutions for science and research
by federating digital capabilities,
resources and expertise
between communities and
across national boundaries.

- 22 national e-Infrastructure providers
- Two EIROs: CERN and EMBL-EBI
- EGI Foundation

www.egi.eu/about/egi-foundation/

International Partnerships

Compute

Cloud Compute : Run virtual machines on demand with complete control over resources

Cloud Container Compute : Run Docker containers in a lightweight virtualised environment

High-Throughput Compute : Execute thousands of tasks to analyse large datasets

Storage and Data

Online Storage : Store, share and access your files and their metadata on a global scale

Archive Storage : Back-ups for long term and future use in a secure environment

Data Transfer : Transfer large sets of data from one place to another

Training

FitSM training : Learn how to manage IT services with a pragmatic and lightweight standard

Training infrastructure : Dedicated computing and storage for training and education

CERTIFICATE

The Certification Body
of TÜV SÜD Management Service GmbH
certifies that

EGI Foundation / EGI.eu
Science Park 140
1098 XG Amsterdam
Netherlands

has established and applies
a Quality Management System for

**The management system implemented to
plan, implement, monitor and continually improve
all business processes under responsibility and to deliver
all services covered by the service catalogue of EGI Foundation.**

An audit was performed, Report No. **707067543**.

Proof has been furnished that the requirements
according to

ISO 9001:2015

are fulfilled.

The certificate is valid from **2017-03-07** until **2020-03-06**.

Certificate Registration No.: **12 100 53643 TMS**.

Product Compliance Management
Munich, 2017-03-08

EGI Federated Cloud

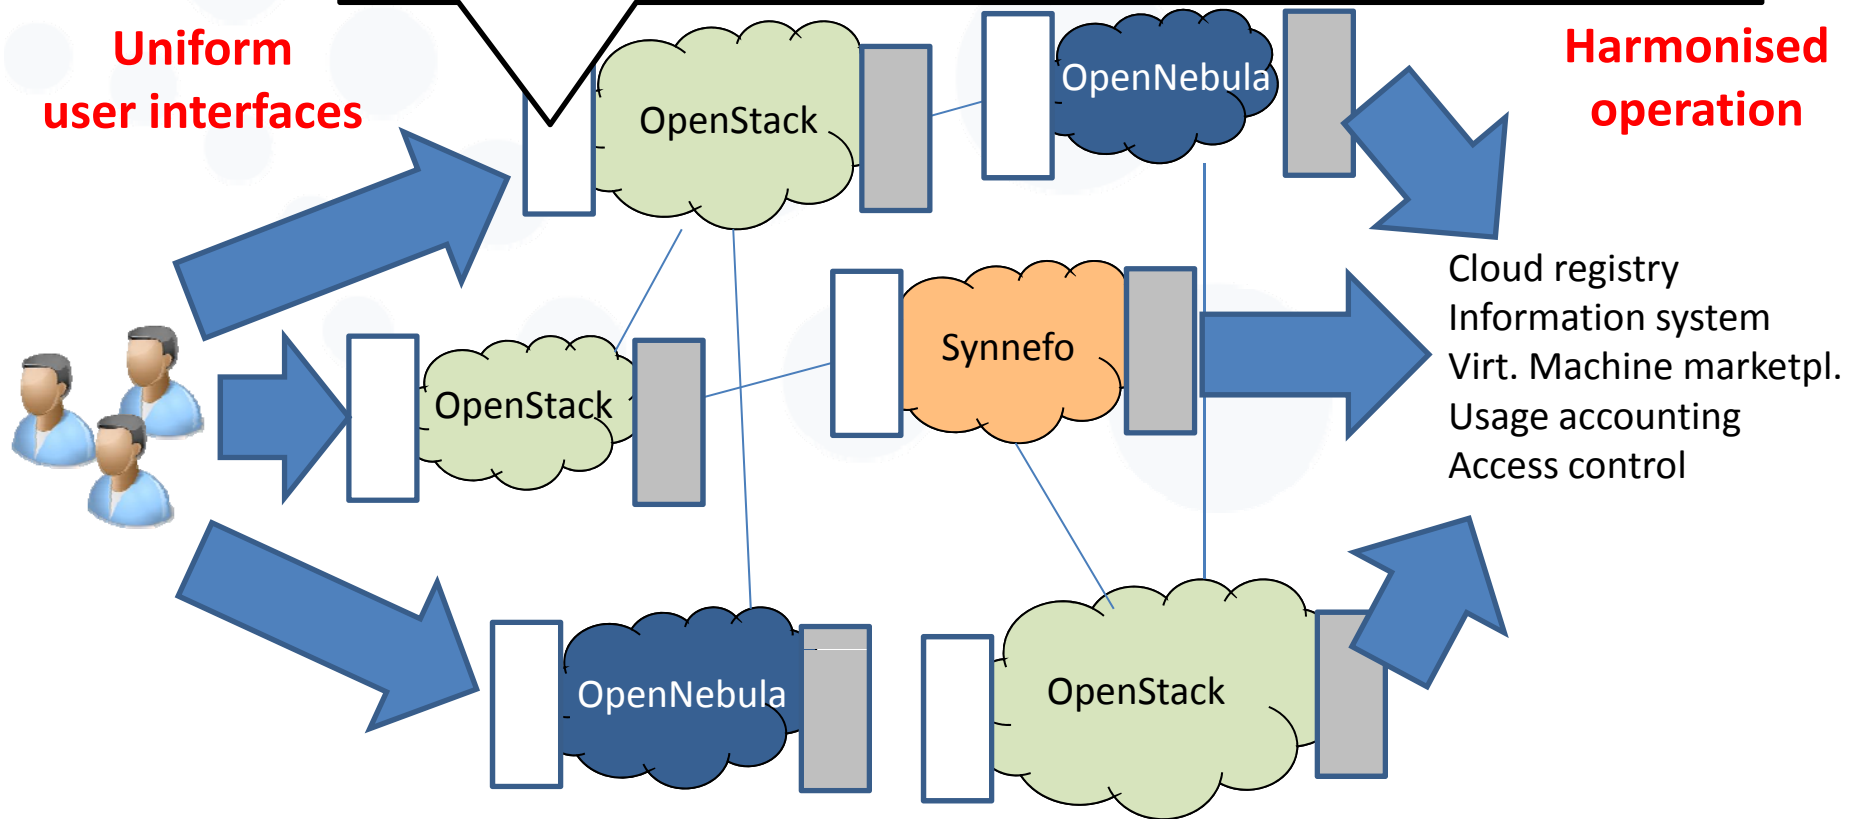

- Grid of clouds
- Unified user interfaces
- Harmonised operational behaviour
- Clouds and their interconnections are based on open standards, open technologies
- Infrastructure → Access online
AND
technology → Deploy at your site

Benefits, technologies

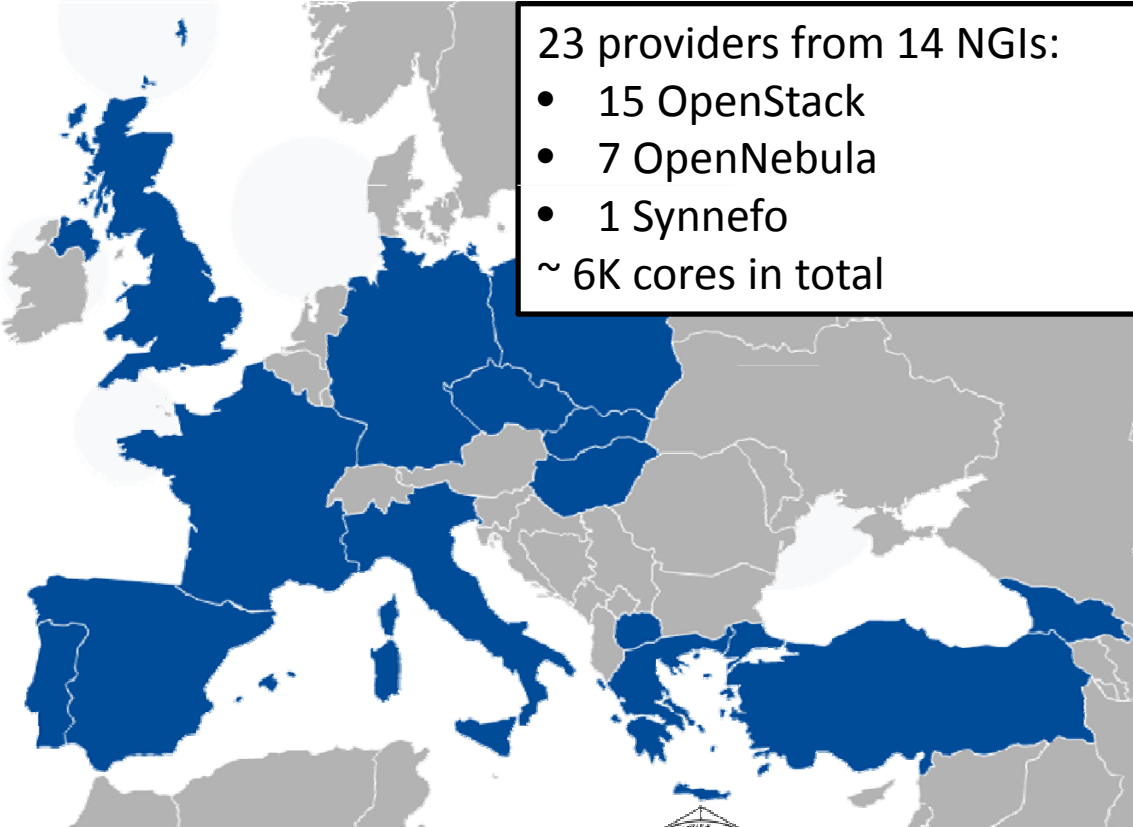

Uniform user interfaces

Harmonised operation

EGI Federated Cloud

23 providers from 14 NGIs:

- 15 OpenStack
- 7 OpenNebula
- 1 Synnefo

~ 6K cores in total

The typical user workflow

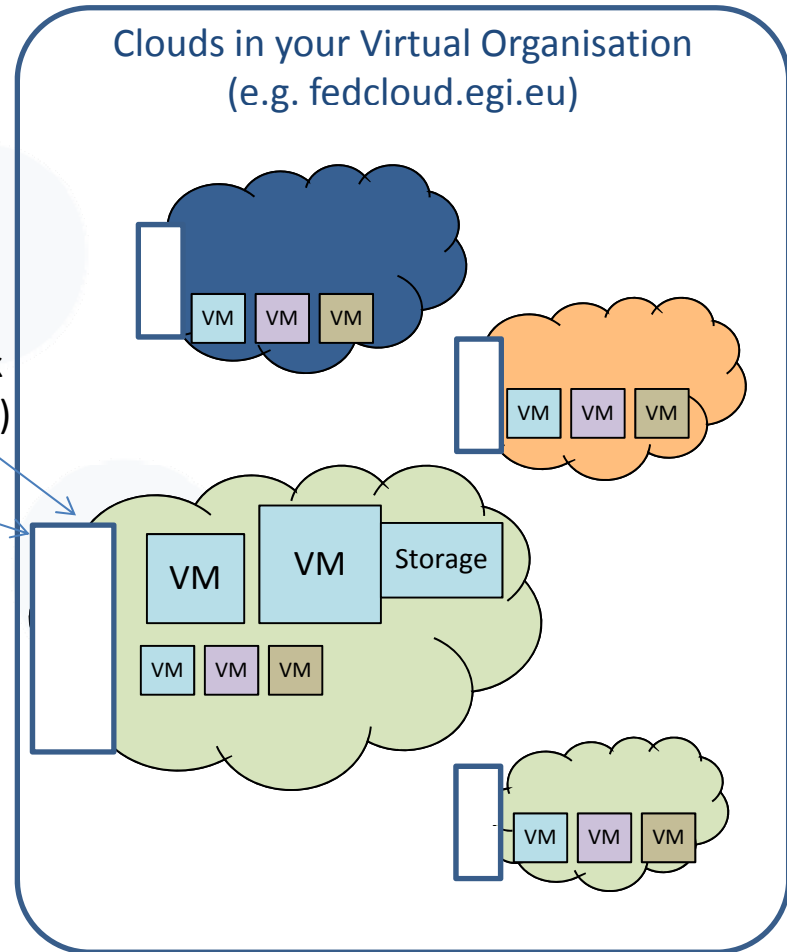

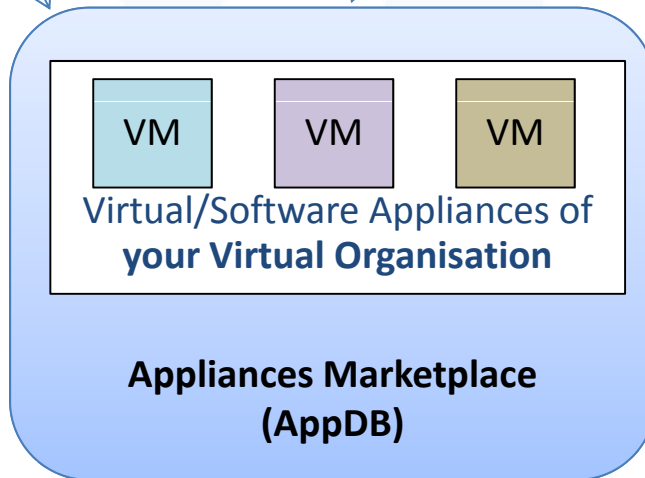

Application Portal,
framework, PaaS, SaaS,
etc..

Programmatic
lookup (API)

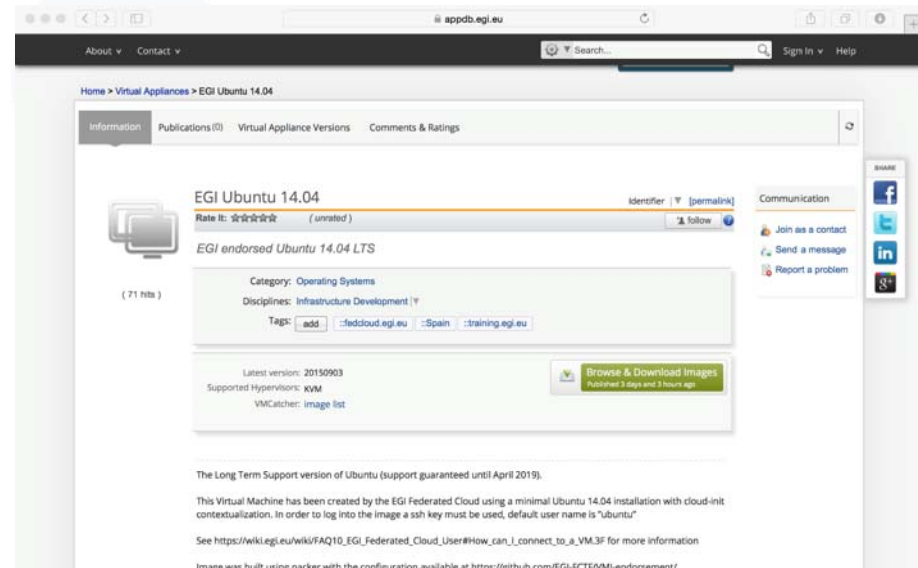

OCCI or OpenStack
calls (CMD/API)

OCCI or OpenStack
calls (GUI/CMD/API)

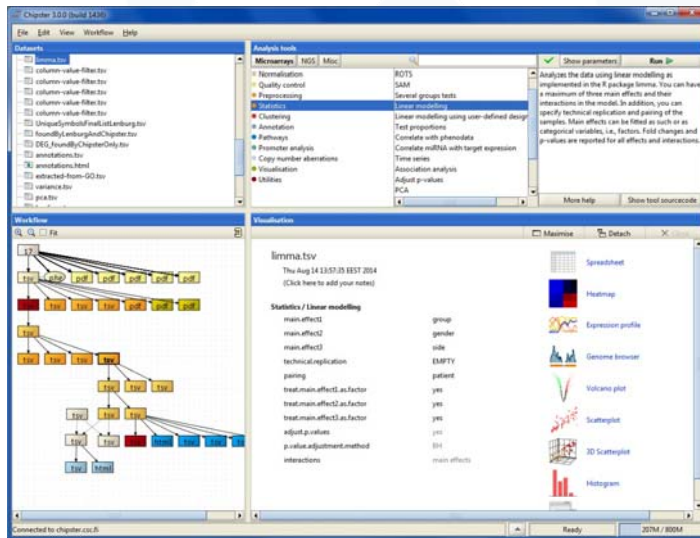

AppDB Cloud MarketPlace

- Open Library of Virtual Appliances
 - Use on clouds or for personal download
 - Re-use, share, associate contextualization
- EGI endorsed VM images, securely configured and tested
- Community curated sets of images
 - Automatic distribution of sets to cloud providers

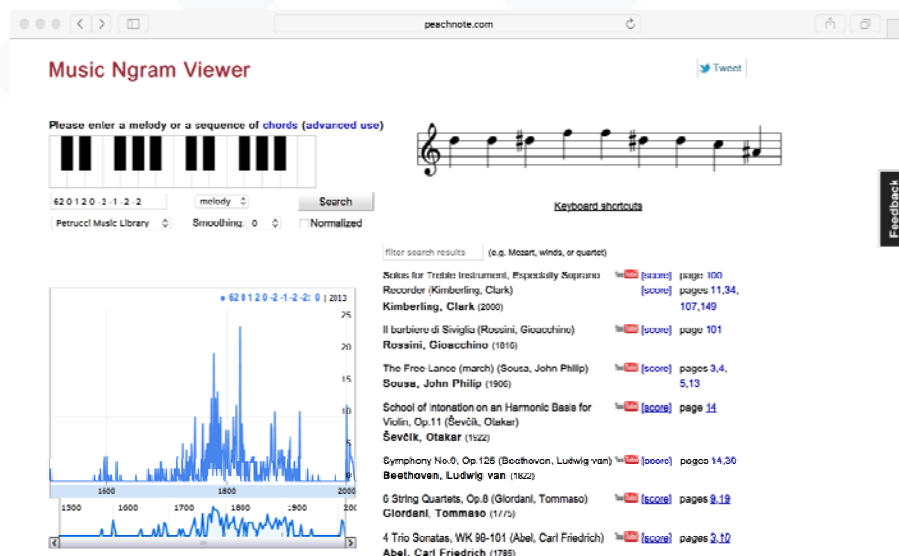

Use cases: Chipster

Research story: <http://go.egi.eu/BIBD>
<http://chipster.csc.fi/>

- BioInformatics application for genomic analysis
- A user-friendly analysis software for high-throughput data with over 350 analysis tools and a large collection of reference genomes
- Users can save and share automatic analysis workflows, and visualize data interactively

Use cases: PeachNote

Music Ngram Viewer

Please enter a melody or a sequence of chords (advanced use)

Scales for Tristate Instrument, Especially Soprano [score] pages 100

Recorder (Kimberling, Clark) [score] pages 11, 34,

Kimberling, Clark (2000) 107, 149

Il barbiere di Siviglia (Rossini, Gioacchino) [score] page 101

Rossini, Gioacchino (1816)

The Free Lance (march) (Sousa, John Philip) [score] pages 3, 4,

Sousa, John Philip (1906) 5, 13

School of intonation on an Harmonic Basis for Violin, Op.11 (Ševčík, Otakar) [score] page 14

Ševčík, Otakar (1922)

Symphony No.0, Op.125 (Beethoven, Ludwig van) [score] page 14, 30

Beethoven, Ludwig van (1822)

6 String Quartets, Op.6 (Giordani, Tommaso) [score] pages 9, 12

Giordani, Tommaso (1775)

4 Trio Sonatas, WK 99-101 (Abel, Carl Friedrich) [score] pages 3, 12

Abel, Carl Friedrich (1785)

- Search Engine and Analysis Platform for music scores. Music Ngram Viewer
- Peachnote relies on EGI services to give their users access to a generous amount of music data.
 - Visited by tens of thousands of users every day from all over the world.
- Uses both VMs for processing requests and Object Storage for storing data.

<http://www.peachnote.com/>

Use case: ELIXIR (European Life Sciences Infrastructure for Biological Information)

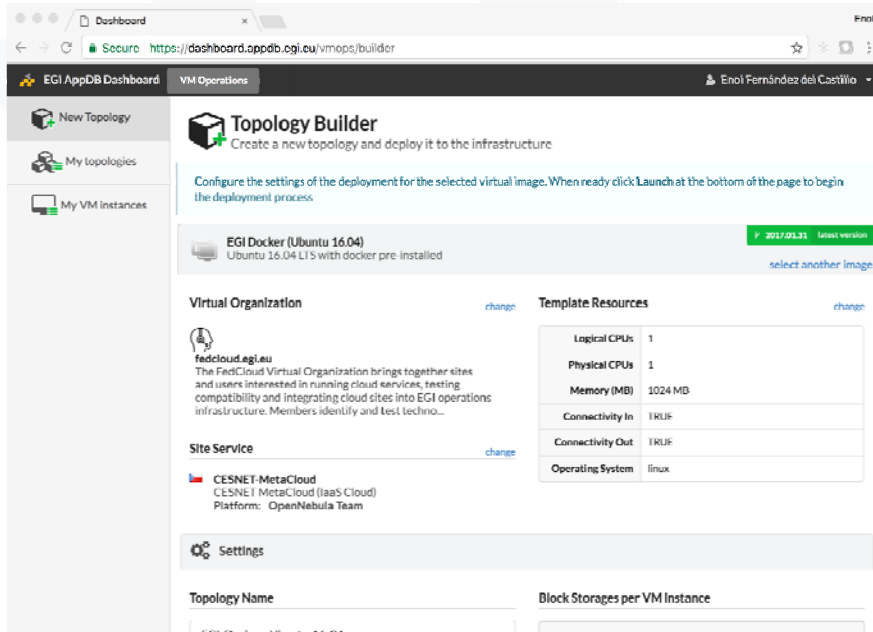

- ELIXIR is building their Compute Platform
 - ELIXIR-CC seeks demonstration of ELIXIR workflows implemented in the EGI Federated Cloud
- Federated Cloud ready:
 - vo.elixir-europe.org VO configured and available at ELIXIR sites integrated into EGI: CESNET, EBI, IN2P3
 - Users identified via ELIXIR AAI + CILogon for management of proxies (hidden to users by gateways)
 - OCCI, native OpenStack and Terraform for resource access
- Now starting piloting phase of workflows into resources

What's coming

- Improved user experience
 - Certificate-less access with new EGI CheckIn
 - AppDB VMOPs (see next slides)
 - IaaS orchestration guides
 - OCCI1.2
- Providers integration:
 - New probes for improved reliability
 - VO-level monitoring
 - Federated authentication (OpenID Connect) via EGI CheckIn
- Go beyond simple IaaS
 - Better orchestration support with ready to use configurations for common applications (Hadoop, Docker Swarm, Kubernetes)
 - PaaS and SaaS

- User friendly web dashboard to manage VMs
 - Integration with AppDB MarketPlace
 - Contextualization/User Management
 - Attached Volumes management
- Support for hybrid clouds via Infrastructure Manager
 - OpenStack, OpenNebula and Synnefo providers accessible via a single interface
- Single-Sign-On with the rest of the AppDB sub-services
 - No need for X.509 certificate for final user
- Currently under heavy testing
 - Beta access expected early April

AppDB VMOps

Topology Builder
Create a new topology and deploy it to the infrastructure

Configure the settings of the deployment for the selected virtual image. When ready click Launch at the bottom of the page to begin the deployment process

Next Steps: become a provider

- Providers keep complete control over their resources
 - Agree SLA with communities with pledged or opportunistic resources
- Set of software components to hook into EGI Federation
 - Minimal intrusion into provider's operations by using public APIs of Cloud Management Frameworks
 - Virtual Appliance with all components (but AAI) for integration, just configure and run
 - Support for OpenStack from Juno onwards (including just released Ocata)
- Integration Manual at <https://wiki.egi.eu/wiki/MAN10>

Next Steps: support for users

- Support through national partners
- Central allocations
 - EGI Federated Cloud: fedcloud.egi.eu Virtual Organisation
 - https://wiki.egi.eu/wiki/Federated_Cloud_user_support
 - To be opened soon: Easy Access platform
- Community-specific allocations
 - <https://operations-portal.egi.eu/vo/search> → E.g. search by discipline
 - You can request a new allocation too! (Through www.egi.eu website)
- Community-specific applications:
 - Browse the EGI Applications Database: <http://appdb.egi.eu> → E.g. search for 'monte carlo'
- Webinars:
 - https://wiki.egi.eu/wiki/EGI_Webinar_Programme → See past recordings
- In case of questions:
 - Contact the User Community Support Team: support@egi.eu

EGI Services

EGI delivers advanced computing services to support scientists, multinational projects and research infrastructures.

The **EGI Services** can be requested by everyone involved in academic research and businesses.

REQUEST SERVICES

ASK A QUESTION

ACCESS POLICY

Compute

Cloud Compute

Run virtual machines on demand with complete control over computing resources

Cloud Container Compute BETA

Run Docker containers in a lightweight virtualised environment

High-Throughput Compute

Execute thousands of computational tasks to analyse large datasets

Storage and Data

Online Storage

Store, share and access your files and their metadata on a global scale

Archive Storage

Back-up your data for the long term and future use in a secure environment

Data Transfer

Transfer large sets of data from one place to another
