

e-Sciences Activities in MAS

Tuesday, 7 March 2017 12:00 (15 minutes)

We mainly focus on our Cultural Heritages which are old Mongolian scripts, Birch bark, Paintings and many cultural, and agricultural treasures. Mongolian Academy of Sciences has been working on the projects about saving our national treasures. Also, we have experience and cooperation with foreign Institutes and local museums and libraries. In order to archive and digitize our cultural heritages we needed delicate technologies and research. After a long time of research and procedure, we digitized hundreds of sutras and many more objects are planned.
