

## Risk Management

*Monday, 20 March 2023 09:00 (1h 30m)*

Risk Management is the tool to organise your limited resources to provide efficient operational security services to your organisation.

In this session we will first give an introduction to Risk Management, and discuss different methods which could be applied. After discussing the concept of Risk Management we will then dive into its components, define risks for an example organisation and do the risk assessment for some of the identified risks. In the hands-on section we will look into the usage of MITRE ATT&CK for threat modeling.

**Presenter:** GABRIEL, Sven (Nikhef/EGI)

**Session Classification:** Security Workshop
