SSC-2023-03

Monday, 20 March 2023 11:00 (1h 30m)

The Security Service Challenge SSC-2023-03 is looking into the CMS's to use the distributed compute infrastructure. In particular we look into the joining elements of the mutliple security teams involved. This particular exercise goes well beyond EGIs logical borders, which oer time got more fuzzy with the advert of new technologies, and additional resources available to our user community. In this session we will demonstrate the SSC framework developed by us and show first results.

Presenters: ROORDA, Jouke (Nikhef);   GABRIEL, Sven (Nikhef/EGI)

Session Classification: Security Workshop
