

Threat Intelligence and Security Operations Centres (Remote presentation)

Monday, 20 March 2023 16:00 (1h 30m)

In the current research and education environment, the threat from cybersecurity attack is acute having grown in recent years. We must collaborate as a community to defend and protect ourselves. This requires both the use of detailed, timely and accurate threat intelligence alongside fine-grained monitoring.

In this session we explore aspects both of sharing appropriate intelligence and the conceptual design of a security operations centre.

Presenter: CROOKS, David (UKRI STFC)

Session Classification: Security Workshop
