On-demand Infrastructure Services Provisioning (ISOD-RG)- (II)

Monday, 21 March 2011 16:00 (1h 30m)

(ISOD-RG) Charter-Discussion BOF

The ISOD-RG intends to leverage work done in the currently existing and concluded OGF working groups and other standardisation bodies to provide recommendation about developing a new generalised architecture and framework for dynamically provisioned virtualised services. The scope of the ISOD-RG will also include investigation of the possible architecture frameworks for the Cloud Infrastructure as a Service (IaaS) provisioning model.

ISOD-RG will have 2 sessions. First session will we be devoted to the ISOD-RG charter discussion, second session will host presentations devoted to the technical discussions of the planned deliverables and existing practices and solutions.

Agenda:
Session 2 - On-going developments and projects overview
(1) Projects presentations
⬚ GEANT3 Project update: Virtualisation Services and Composable Services
⬚ GEYSERS Project: Infrastructure Virtualisation
⬚ Other projects
(2) Potential contributions discussion
⬚ Overview and analysis Cloud provisioning models
⬚ Infrastructure Services Modeling
⬚ Other proposals about contribution (e.g. WSAG vs SLAM, etc.)

Presenters: GUOK, Chin; DEMCHENKO, Yuri

Session Classification: On-demand Infrastructure Services Provisioning
