

## Next Generation Usage Records

*Tuesday, 22 March 2011 11:00 (1h 30m)*

(UR-WG) Group Discussion

The Usage Record Format (URF) has been used widely to track resource usage mostly in the context of computing environments.

This session discusses and presents approaches towards a next generation of usage records covering also data and network usage record tracking.

Agenda:

- (1) Review URF in compute and its usage
- (2) Storage Accounting Approaches
- (3) Network Accounting Approaches
- (4) Towards URF 2.0
- (5) AOB

**Presenters:** CRISTOFORI, Andrea; NILSEN, Jon; RIEDEL, Morris

**Session Classification:** Next Generation Usage Records
