

Cloud and Grid Security discussion (III)

Friday, 25 March 2011 11:00 (1h 30m)

This session is an opportunity for researchers in cloud and grid security to present recent developments. Hot topics include authorisation and delegation, firewalls, security aspects of virtualisation, applications of encryption, interoperation and performance, protection against DDoS, standards, and much more.

The Cloud Security session at OGF30 was a great success, with presentations on many different aspects of cloud security, from both industry and academia.

Presenter: JENSEN, Jens (STFC RAL, UK)

Session Classification: Cloud and Grid Security discussion
